

Financial

Financial institutions face an increasing burden dealing with non-core banking functions. BSA, Currency Transaction reporting and many other regulatory/compliance duties have created additional work which requires the current staff to be expanded or work more hours.

Independent Forms Services offers a solution to these challenges by allowing you to use your current staff to perform banking duties instead of storing, maintaining and distributing your print and office supply inventories. Through our Forms Management Program, your print supplies will be maintained at proper levels and distributed to your branch locations. In addition, Independent Forms Services will track and report monthly usage quantities. Our cost center accounting will let you know where your dollars are being utilized.

Simply stated, we help you to concentrate employee efforts towards serving your clients instead of moving paper and supplies.
