

Healthcare

Healthcare organizations face an increasing burden dealing with non-core daily functions. The sheer amount of paperwork that a healthcare facility produces in a week is staggering. HIPPA and many other regulatory and compliance duties have created additional work which requires the current staff to be expanded or work more hours.

Independent Forms Services offers a solution to these challenges by allowing you to use your current staff to perform more important duties instead of storing, maintaining and distributing your print, marketing material and office supply inventories. Through our Forms Management Program, your print supplies will be maintained at proper levels and distributed to your locations. In addition, Independent Forms Services will track and report monthly usage quantities. Our cost center accounting will let you know where your dollars are being utilized.

Simply stated, we help you to concentrate employee efforts towards serving your patients instead of worrying about your paper and supplies.
